

(a) Counterfactual influence by region, ConvNeXt-Tiny
(mean $|\Delta p|$ when suppressed, DER-MIL)

(b) Learned reliability vs actual influence
ConvNeXt-Tiny, per region, per model

(c) Reliability predicts influence? ConvNeXt-Tiny
Within-patient Spearman ρ , R vs $|\Delta p|$ (across frames)

(d) Reliability across frames, real patient 2245
(DER-MIL, ConvNeXt-Tiny; 8 valid frames)
